What is a function in mathematics?. This question is answered in quite some detail (occasionally technical) in the paper Rekindling critical thinking: heeding major errors in current Introduction to Proof type textbooks. Note that this is only an initial version, prepared for MathFest 2015. All questions, comments and suggestions sent to raymond.boute@pandora.be would be much appreciated.

IDs must be unique--you can't have more than one element with the same ID in an html document. Classes can be used for multiple elements. In this case, you would want to use an ID for "main" because it's (presumably) unique--it's the "main" div that serves as a container for your other content and there will only be one.
