“Optimal Workshop makes it so easy to do user research, there's no excuse to make uninformed design decisions” Evan Leach, Senior UX Architect

## Plans and Pricing for Our User Research Tools | Optimal

In the design of experiments, optimal designs (or optimum designs) are a class of experimental designs that are optimal with respect to some statistical criterion. The creation of this field of statistics has been credited to Danish statistician Kirstine Smith. In the design of experiments for estimating statistical models, optimal designs allow parameters to be estimated without bias and with ...

Step #2 Now find the partial derivative with respect to each variable  $x$ ,  $y$  and the Lagrange multiplier of the function shown:  $L(x, y) = f(x, y) - [g(x, y) - k]$  Step #3 Set each of the partial derivatives equal to zero to get  $L_x = 0$ ,  $L_y = 0$  and  $L_\lambda = 0$  Using  $L_x = 0$ ,  $L_y = 0$ , proceed to solve for  $x$  and solve for  $y$  in terms of  $\lambda$ .

## Constrained Optimization: The Method of Lagrange Multipliers

In computer science, a problem is said to have optimal substructure if an optimal solution can be constructed from optimal solutions of its subproblems. This property is used to determine the usefulness of dynamic programming and greedy algorithms for a problem. Typically, a greedy algorithm is used to solve a problem with optimal substructure if it can be proven by induction that this is ...

x Hepatocellular carcinoma (HCC) is a rising condition both world-wide and in Europe, already being one of the leading causes of cancer-specific deaths. Particular characteristics of the disease associated with its location in the liver and mixed etiology remain a challenge. Surgery, both liver resection and liver transplant, is the recommended curative treatment for the eligible patients.
